5 Steps to Prepare for DMS

Declarants need to prepare for the decommissioning of AGS and GPA.

- 1 If your business has not already done so, register with the **Dutch Chamber of Commerce**
- 2 A copy of the **application form EMR** needs to be sent to the Dutch customs authorities
- 3 **Authorisations might need to be adjusted** and renewed for DMS 4.0 and DMS 4.1. If this is not done, the current set-up might not be valid anymore, leading to delays in transitioning.
- 4 Make sure you **know what data needs to be sent to customs authorities** when transitioning from AGS/GPA to DMS, and that you are able to do so by the deadline. This is the data that customs need to validate your declaration.
Note: Data requirements are more extensive in DMS compared to AGS or GPA/SPA.
- 5 **Choose what types of declarations you want to use** and assess how you can optimise your declaration flows and processes, *for example*, will you lodge a standard declaration or use the Entry in the Declarant Records (EIDR)?
