

Product sheet CAS Classification

Confidently classify your goods with AI

Reduce the time you spend on manually classifying your products. Let Artificial Intelligence (AI) assist you, diving into the maze of classification codes.

Simply review the suggested classifications and you're ready to go. Get assurance on the application of the correct duty rates and reduce the risk of big fines from the authorities.

Our AI-powered CAS Classification solution finds the best-suited product classification code(s) or verifies your current classifications based on the information you provide, and motivates why a particular code is being suggested, giving you the confidence you need.

The screenshot displays the C4T CAS Classification web application interface. On the left is a dark blue sidebar with navigation options: Home, Items, Classification (selected), and Bulk Classification. The main content area is white and contains a form for inputting product details. The form fields include: Description (empty), Item ID (Autogenerated), Add image (optional) (Bestand kiezen / Geen bestand gekozen), Jurisdiction (EU), Country of origin (Third country), and Classification code to verify (Optional). A blue 'Classify' button is at the bottom of the form.

Below the form, the results section shows the following information:

- Description:** "GUZACK Running Armband for iPhone 15 14 13 12 11 Pro Max/14 Plus/XR/XS/X, Galaxy S23/S22/S21, with AirPods Pouch Card Slot & Key Pockets, Sports Arm Bands Cell Phone Holder Fit Up to 6.9 Inches Phone"
- Brand:** Guzack
- Color:** Green Zipper (Up to 6.9")
- Item ID:** Item_000008
- Jurisdiction:** EU
- Country of origin:** Third country (optionally enter 2-letter country code)
- Classification code to verify:** Optionally enter a commodity code for verification

At the bottom of the results section, there are four buttons: 'Classify', 'Go to Item', 'Download Results', and 'Delete'.

The results section also displays a **Confidence score: 8.8** and a **Code: 4202929890**. Below this, a detailed explanation of the classification is provided, including the Harmonized System (HS) code and a list of similar items.

VIII Raw hides and skins, leather, furskins and articles thereof, saddlery and harness, travel goods, handbags and similar containers; articles of animal gut (other than silkworm gut)

42 Articles of leather, saddlery and harness, travel goods, handbags and similar containers; articles of animal gut (other than silkworm gut)

4202 Trunks, suitcases, vanity cases, executive-cases, briefcases, school satchels, spectacle cases, binocular cases, camera cases, musical instrument cases, gun cases, holsters and similar containers; travelling-bags, insulated food or beverages bags, toilet bags, rucksacks, handbags, shopping-bags, wallets, purses, map-cases, cigarette-cases, tobacco-pouches, tool bags, sports bags, bottle-cases, jewellery boxes, powder boxes, cutlery cases and similar containers, of leather or of composition leather, of sheeting of plastics, of textile materials, of vulcanised fibre or of paperboard, or wholly or mainly covered with such materials or with paper

420291 Other

42029200 With outer surface of sheeting of plastics or of textile materials

Product sheet CAS Classification

How it works

As the selected classification codes determine the applicable duty rates, excise rates, measures (such as import restrictions), and rulings, it can have a ripple effect on your customs operations. It's thus not unexpected that classification is considered one of the cornerstones of customs. Organisations with a lot of (new) items spend a lot of time and money to find the correct classification code for each item.

With CAS Classification, this manual task is partly taken out of your hands. Powered by artificial intelligence, it suggests classification codes based on the SKU description and/or images, and optionally the country of origin you provide. We require a quick check from your side on the codes that require your attention, and you're good to go.

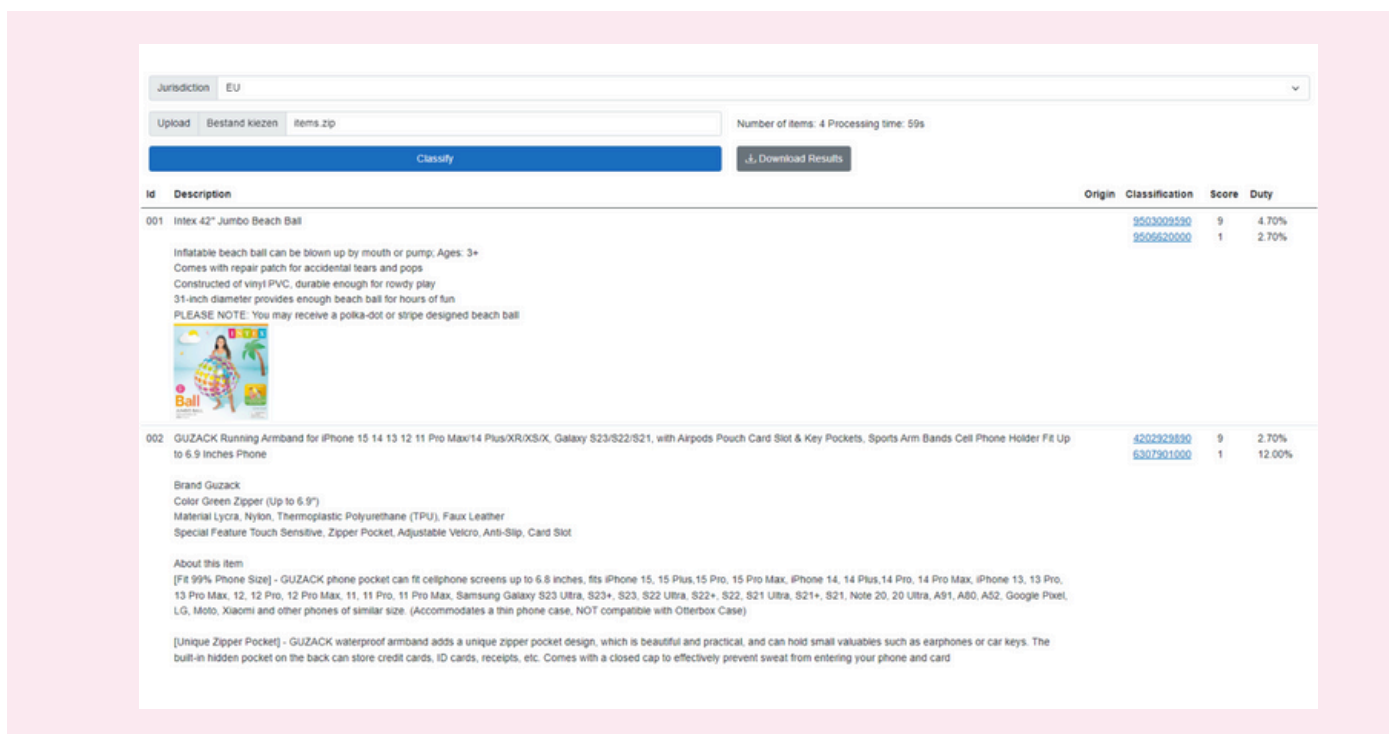

The more information you enter and the more extensive the description, the more accurate the result will be. In return, you get the suggested classification code and the applicable duty rate, measures and rulings. An explanation of the motivation for the chosen classification code and a confidence score help you decide about the correctness of the results.

Next to generating classification codes, the solution can also perform a health check on your existing classifications to check whether these are still the correct codes to be used for your products, verify that the codes are still valid, or find relevant rulings. Simply upload a document including the current classification code, descriptions, images, and country of origin, and these get validated. Changes to classification codes are suggested where applicable as the solution immediately shows those classifications that require your attention.

Item management allows you to keep track of all products you classified. You can select the preferred classification code and add comments to why you selected this code, classify your products again and download your items with their respective classifications.

Key benefits

- Automation.** Replace a tedious, time-consuming and error-prone process with an automated solution. Let it do the background work acting like an assistant, one by one or in bulk, to define the correct code and you make the final call.
- Compliance.** Apply the correct duty rates and measures and make sure to verify your classifications from time to time, double-checking whether you are still using valid classification codes. Lift compliance to the next level by combining classification with automated filing in CAS.
- Validation.** Provided reasoning and confidence levels on suggested commodity code options give you the assurance you need to decide on the right classification code for your goods.
